Git
Tableau

TESTING SOFTWARES

Jest
Mocha & Chai
Cypress
Storybook

PROJECT MANAGEMENT TOOLS

Confluence
Jira
Asana

CLOUD PLATFORM

Digital Ocean
HubSpot

Education

Lighthouse Labs
Diploma Full-Stack Web Development

Feb. '22 - Apr. '22

University of Toronto
Bachelors of Commerce Finance

Sept. '15 - May '19

Employment

Ryna

Software Engineer

Toronto
May '22 - Jan. '23

- Successfully launched thereyna.com 50% ahead of schedule by optimizing development process
- Implemented Datadog monitoring for codebase, resulting in improved reliability and 30% faster incident resolution time.
- Created modular, reusable components for 15% faster development process
- Deployed website bundle using nextjs, improving lighthouse performance and SEO score by 20%
- Added dynamic data population by making API calls to the Golang backend using Axios.
- Utilized React Redux for improved state management in the application.

Tech Stack: NextJs, Golang, Axios, Datadog, Digital Ocean

StackAdapt

Business Analyst

Toronto
Sept. '21 - Feb. '22

- Performed data pulls/analysis through redshift and tableau to better understand the impact of marketing campaign's being run for clients.
- Managed 3+ client relations, ensuring their programmatic deals were set up in a timely manner.

Royal Bank of Canada

Graduate Rotational Analyst

Toronto
Sept. '19 - Aug. '21

- Worked and manipulated large data sets with SQL and tableau to identify key business opportunities totalling to \$150,000 in the foreign exchange market.
- Created various macros for business operation teams reducing the task time by 50%.

Projects

OWOC

July '22 - Aug. '22

- Frontend React application for a local Toronto charity to help fund children's education in China
- Deployed the website live with GitHub Pages
- Added mobile view support through flexbox

Tech Stack: React, CSS

Krypto

Apr. '22

- Single page React website designed to address the overwhelming number of crypto information sources and provide users with a smooth & seamless experience.
- Preformed multiple API calls from various sources with Axios to populate dashboard metrics
- Leveraged Material UI and SASS to provide a modern user experience
- Used the chart JS library allowing for real time pricing charts on all cryptos

Tech Stack: React, Material UI, SASS, ChartJS, Socket IO, coinGecko, Postgresql, Express JS, Node JS

Interview Scheduler

Apr. '22

- Built a React application to allow users to book/cancel an interview in specific time slots with an interviewer of their choice.
- Used multiple REST APIs for both consuming and mutating data that lived on the server
- Used websockets for low-latency bi-directional data flow between the user and server for an improved user experience
- Maintained good coding practices by adding both unit & integration tests with every new feature with Storybook/Jest/Cypress

Tech Stack: React, SCSS, Storybook/Jest/Cypress
